

Item	Descrizione
<b>Facilities Manager</b>	Monitor and control equipment room facilities: power, energy efficiency, temperature, humidity, and physical access security
<b>Network Traffic Analyzer</b>	Monitor and view traffic statistics according to customizable dimensions by users, services, applications.
<b>Server Manager</b>	Monitor server hardware performance, configure and deploy system software and OS upgrades; manage access, services, and virtualization
<b>WLAN Manager</b>	For provisioning and managing wireless LAN ACs, APs and devices; provides instant troubleshooting and maintenance capabilities
<b>Storage Manager</b>	For predictive modeling, and monitoring storage capacity, access latency and IOPS performance, VMs, switches, and SAN/NAS resources
<b>eLTE Manager</b>	Unified management of converged LTE broadband networks supporting high-performance IP voice, data, and video applications
<b>Application Manager</b>	Monitor and manage system software, middleware, database, and web apps for proactive O;M, reporting, and analysis of application logs
<b>Communications/Collaboration Manager</b>	Automatic phone scanning, voice tracing, and telepresence conference diagnosis, ensuring high availability of video conferencing services
<b>Video Surveillance Manager</b>	Specialized features for managing video surveillance cameras, connections, availability, and faults in Huawei and mixed vendor systems
<b>Optical Networking (xPON) Manager</b>	For monitoring xPON networks, ensuring performance of OLT uplink and downlink ports, ONUs, and configuring automated alerts
<b>Server</b>	CPU: dual-core 2 Ghz o superiore 4 GB RAM 40 GB di spazioe disco Windows server 2008 + SQL Server

## 7.6 AUTENTICAZIONE

L'APPALTATORE, oltre alla realizzazione della rete wireless per il collegamento degli utenti interni all'Autorità Portuale di Ancona, dovrà prevedere la gestione di una parte della banda della rete wireless stessa per la connessione di utenti denominati "Guest".

### 7.6.1 Software per Autenticazione

Per la realizzazione di questa modalità, il COMMITTENTE dovrà prevedere

- Una connessione Internet
